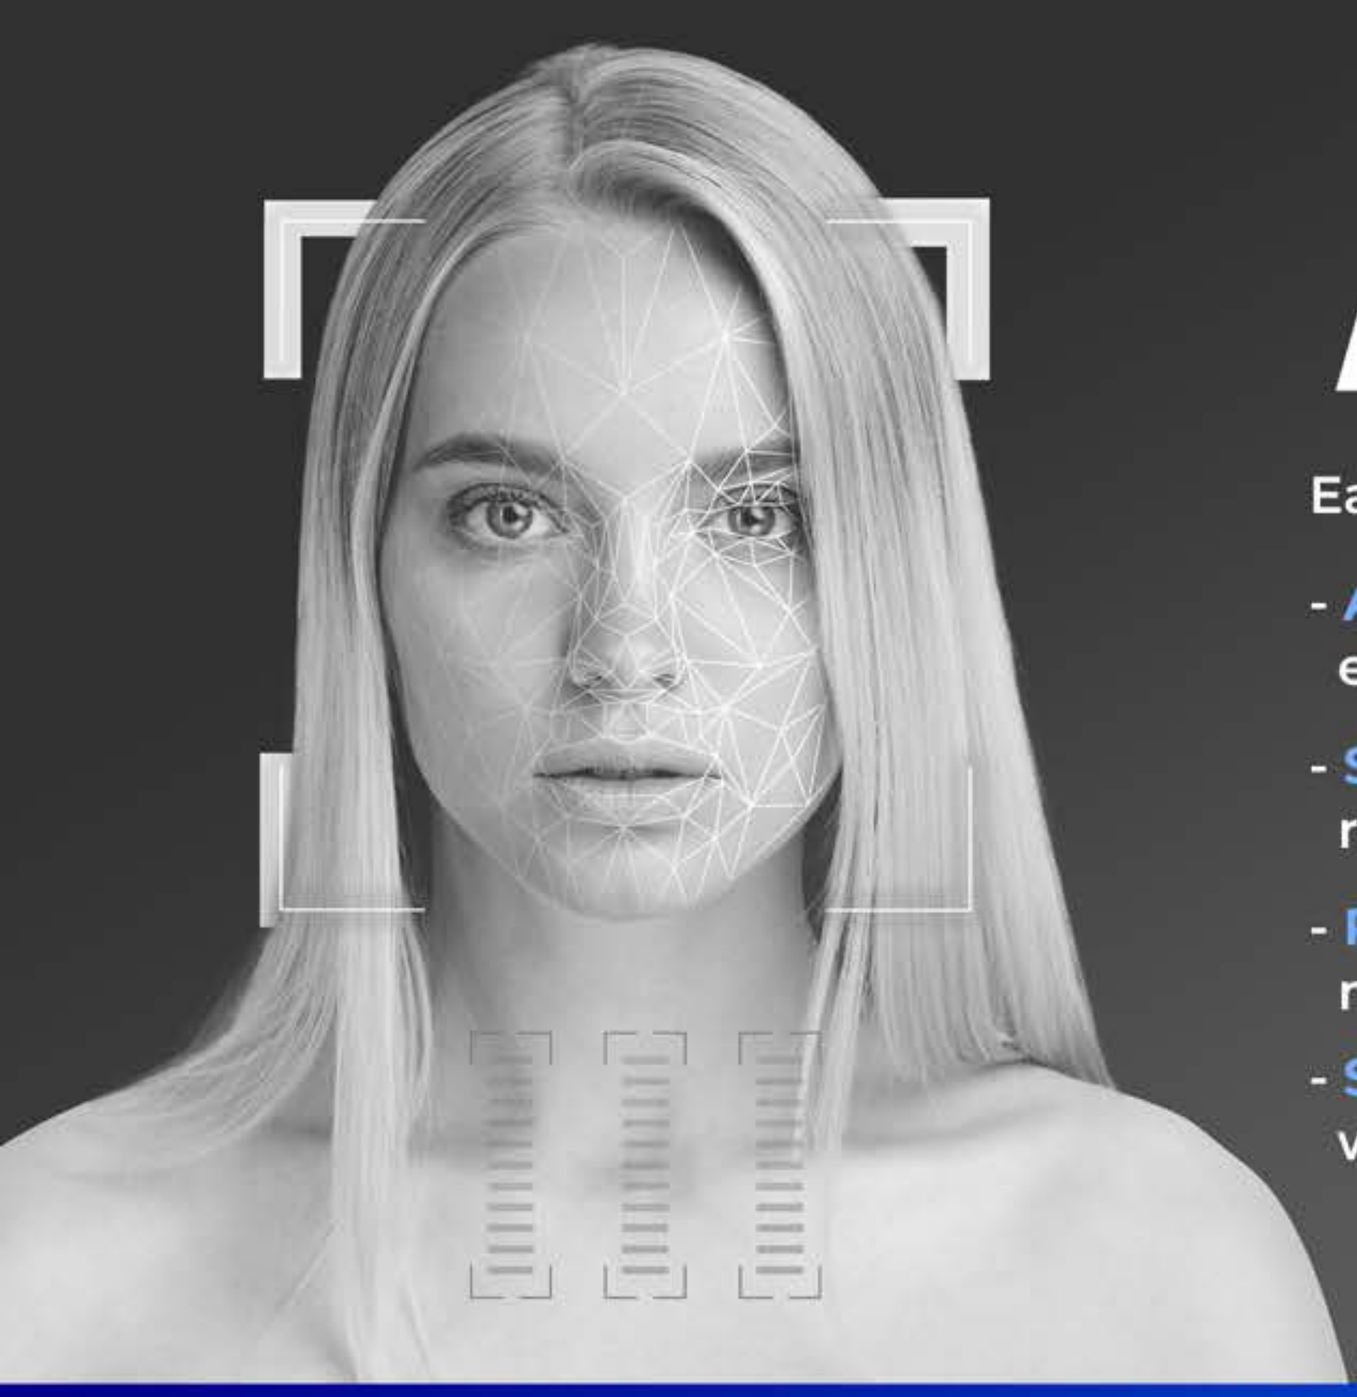
ZEUS®
Technology for us



I-VIEW

Easy to use AI analyzer that can be used for:

- **Aging analysis:** Forehead, dorsal nasal & eye area and naso-abial folds analysis
- **Sensitve analysis:** Acne, redness, acne rosacea and barrier analysis
- **Pigment analysis:** Moles, freckles, acne marks and spots analysis
- **Skin quality analysis:** Pores, porphyrin, wrinkles and moisture analysis

Artificial Intelligence powered facial skin analyzer

Easy to use interface

A large touch screen panel display with easy to read options, instructional and functions videos readily available and 19 languages support makes it a breeze to use.

In-depth analisys

By using multiple light source targeting analysis like white light, both negative and positive light polarization, UV light, and wood's light, it can detect and analyze every miniscule detail.

Skin prediction

According to the customer's current skin condition, AI algorithm is used to simulate aging at different stages allowing to prevent future conditions.

I-VIEW

Facial Skin Analyzer - Artificial intelligence Assisted

I-View AI Intelligent Imager focused on solving skin problems by integrating eight spectral imaging technologies and can professionally and objectively analyze seventeen problems of facial skin with flexible operations.

By using its skin analysis features, the machine can sugest treatment for current skin conditions and predict future skin issues by using its AI algorithm to simulate aging.

Single data-point analysis

Multiple data-point comparison

Detailed report generation

Daniel Chavez

Brows beauty med spa

We have worked with SupraMedical for several years now, we recently aquired an additional 2 machines and I am absolutely amazed on the quality of all of their equipment truly top of the line.

Their support is also incredible as they are truly there to ensure you have the help and support you need to be successful. I highly recommend them to anyone seeking to aquire quality equipment.
